

The last but not Least

By : Seap Sokunthea (Ju Ii)
International Internship Scholarship 2017
Student from Life University, Cambodia

Since the first day I stepped on Lampung's land I felt everything would be alright with me. Alright, for my internship program at Lampung which is in culture city and the social structure of the Indonesian society brought me to learned a lot of culture, Bahasa Indonesia, traditional dance, Pencak Silat and so on. IIS is a kind of program that taught me a lot about working skill and especially, in the international office at Darmajaya. I am really happy that I could join International Internship program because it made me know a lot, working in team, self-study and try every situation to be possible. Such as study club about English and French club I tried my best to find the good topic to share and learn together with my friends and other students. About Pencak Silat and traditional dance it wasn't easy for me to learn. I can say I'm so poor with both of activities but at least I could perform myself in front of many people even I did a mistake but I'm still happy that I can do it. I won't give up. IIS brought me much motivated about our mind to do what we can't do and let us try to do our works as much as we can. Bahasa Indonesia class is the good one that I like, it was similar like a primary school student to start learning with new language but it was very useful for me to talk with the local people and helped me to get close to my Indonesian friends in the way of communicated with each other and also I could buy or ordered foods by myself. One thing that interested is on the radio air because I introduced myself to everyone who like to listen the radio at Lampung and shared about my impressed about Lampung and the good point is about Indonesia country. After that I took the taxi back to home the driver asked my name and then I told him about myself he said to me that he remembered my name when I was on air a few days ago. It was really good that everyone can know me through radio in Lampung.

A special feeling of mine when I visited disability school that had many students who aren't hear and talk to me. It was deeply pity all the kids and I realized about how life is going with us right now and I don't want to compare my life with each other anymore because they're really difficult more than me so much. I feel enough and bless to me with them. It's educated me not to feel greedy or feel jealous

(peace in heart). Moreover, For the good program about International Outbound made me learnt about team work, leadership and made friends with among of hundred students from different school. It is a great one of program I joined because I met many people and I can share about my knowledge with them. One more, about visiting class and visiting high school I really happy because I got many and many new friends and famous in every class and at high school. They want to know about me, talk to me and make friends. I felt more confident in this part, I think it was good point that I did my presentation in front of over 600 students and made them listened and look at me like an audience.

For community development, I went to cleaned the Masjid and homestay of Darmajaya and people who donated for helping the children and poor people to stay at there. It's one part of activities that helped our mind more peace. Anyway, for the trip 2 times to the beach it was a best time for me to explored around Lampung's beach and it is on Sumatra island. Pahawang beach is still in my mine to visit again because I'm fully in love with the nature and the Nemo garden under water. Even both places I visited were far but it was so good view and relax and I want to visit again. The whole month in Lampung always make me miss there a lot with a lovely and friendly people who always take care about everything and always helpful to me over there. The good director Ms. Rahmalia never let me hungry and brought me to many nice restaurants, a good supervisor Reli

the helpful boss never let me fail, corrected me but if I did wrong he the one who get blamed instead of me. Thanks a lot for everyone at International office and especially my family at Lampung that gave me a very comfort home stay and delicious breakfast for me.

Lampung still in my list to visit again and I would like to say thankful for IIS that taught me many things about experienced of life and working style at the office and social as well. I hope I could join IIS 2018 again or share to my friends to join it like me too for the next year. I do love Indonesia and miss Bandar Lampung and my team work, my friends at international office and at Darmajaya so much. Thank so much for International Internship Program.
